

Save the Foxes

By a fox

I am a friendly fox. I'm writing this because we are facing many problems that might lead to extinction. We need your help to solve these problems and save us.

The first problem we are facing is excessive hunting. You keep hunting us for medicine and our fur. Therefore there will be fewer foxes left in the wild. We will go extinct unless you stop hunting us for our fur and body parts.

The second problem we are facing is destroying our habitat. You keep turning our habitat into rural or construction areas. Therefore we will have no home and might even starve due to no food near our home. We will be extinct unless you stop destroying our habitat.

Another problem we are facing is extreme land pollution. You continuously dump rubbish and harmful materials on land. We will get diseases and die. We might go extinct unless you stop dumping all your waste into our homes.

Please take part in saving our life before it is too late!

Save Our Foxes!

Stop hunting us!

Protect our habitat!

Stop land pollution!
