Save the Whales

By A. Whale

I am a friendly whale and I am writing because we are facing a lot of problems. We need you to help save our lives.

The first problem we are facing is water pollution. You keep throwing away so much rubbish and dumping waste into the sea. Therefore the water becomes polluted and toxic. We will all die unless you stop throwing away rubbish and waste into the sea.

The second problem we are facing is hunting. You keep catching us for our oil to make perfume and some research. Therefore very few of us are left in the sea. We will become extinct unless you stop hunting us.

The third problem we are facing is fishing. You keep fishing in the areas where we live. Therefore there are fewer fish for us to eat. We will have no fish to eat unless you stop fishing in our living areas.

Please take action before it is too late!
